When their humans brush them, Willow and Bayou feel like kittens. After brushing them their humans throw their hair in the garden so the birds can use it to build a comfortable nest.

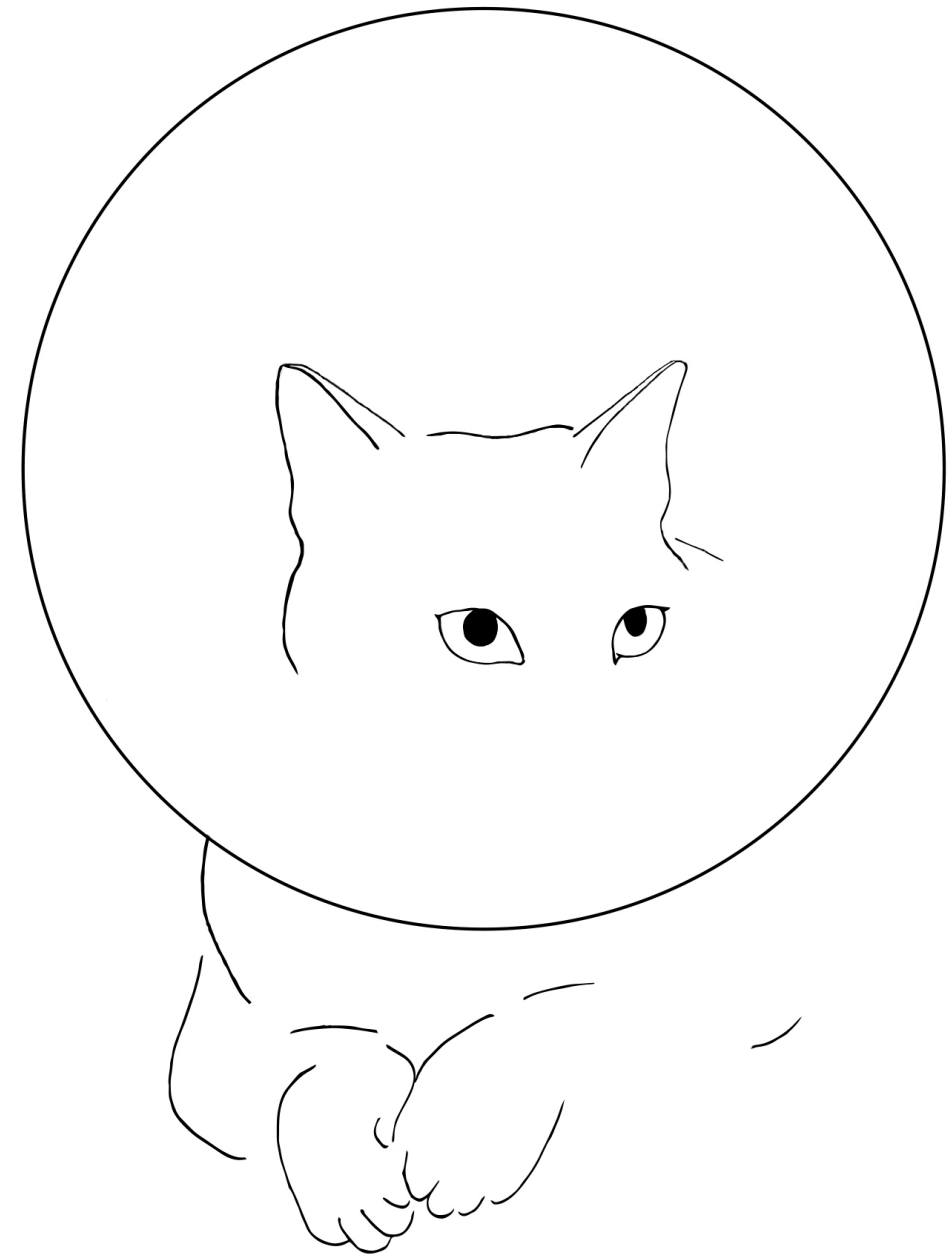

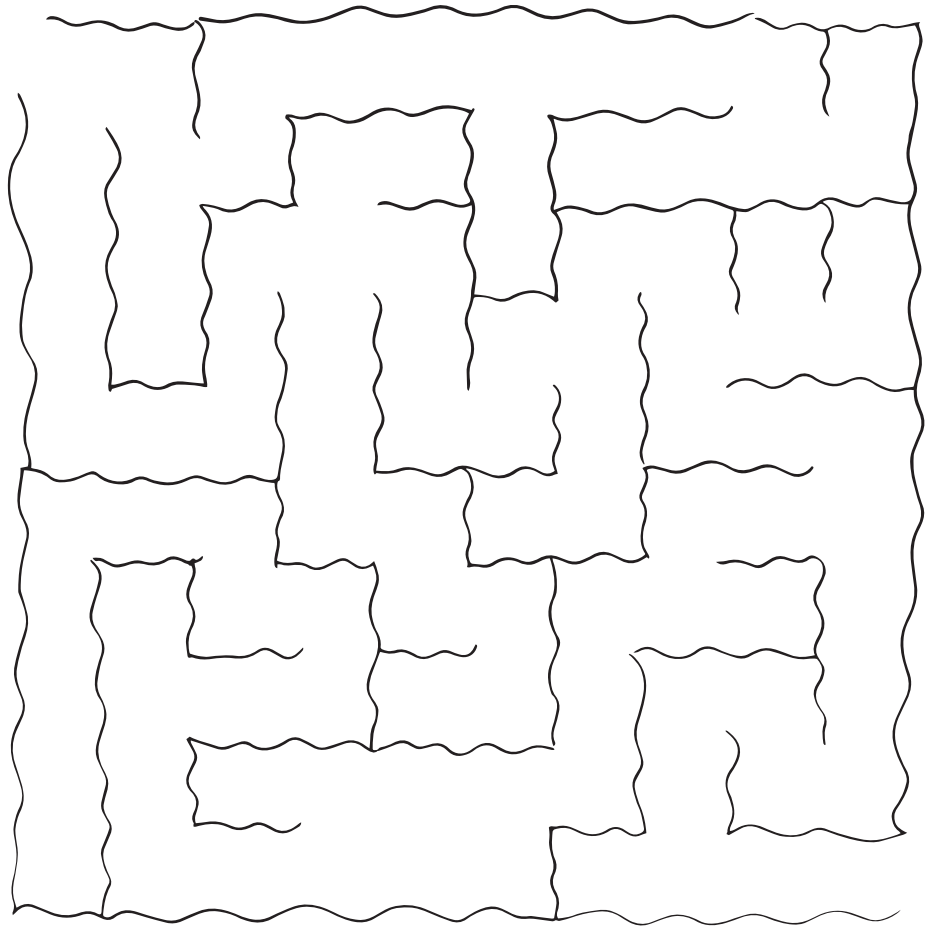

Willow is a contorsionist cat and makes very funny positions when he sleeps. Cut the shapes and assemble them correctly to find out his most recent position.

Another one of their favorite activities is watching birds and squirrels. Can you help the squirrel find his hazelnuts?

Today Willow doesn't feel well... After visiting the veterinary with his humans, he has to wear a weird cone around his neck for one week. To make him feel better, can you add some nice drawings on his white cone?
